# THE PRIIP KID TAKES THE RELAY

PRISMA

AUTOMATED PRIIP KID PRODUCTION

Web-based. Short turnaround time. Tailor-made solution.

- Automated production workflow
- Coordination and production of multi-jurisdictional documents
- Monitoring functions for specific KID components
- Streamlined translation processes
- Automated data integrity checks
- Embedded quality checks
- Layout compliance with the corporate identity requirements
- Enforcement of consistent structure across KIDs
- Pre-configured KID components and wordings in compliance with the EU Regulation
- Reuse and synchronisation of information across multiple documents

ADVANTAGES

- Reduced time-to-market
- Mitigation of human error risks
- Automated data input
- High level of customisation
- Compliance and monitoring features
- Output in diverse formats

TECHNICAL DETAILS

- Secure web-based solution
- Industry-standard SSL/TLS cryptography for transmission of data (sFTP or HTTPs)
- Software hosted on PSF-certified IT infrastructure in Luxembourg
- Possibility to integrate with your existing data systems and automate KID updates via XML import
- Generate reports in various formats (e.g. CEPT templates, Openfunds, FundsXML)

PROJECT MANAGEMENT

- Automated KID production
- Production pilot language version
- Production translated language versions
- Distribution
- Project monitoring
- Time management
- Quality checks
